

## PROJECT PROFILE

### Radiant Shield™ Knee Wall Application

## Fall Parade of Homes PCBA 2010 Showcase Home Lakeland, FL

### *Project Information*

**Builder/Developer:**

Hulbert Homes, Inc., Lakeland, FL

**Insulation Contractor:**

Combee Insulation, Lakeland, FL

**Product Application:**

Radiant Shield™ Hi-Perm (1,000sf installed)

**Completion Date:**

August 2010

### *The Problem*

Needed an insulation facing for their knee wall, that could hold the batt insulation in place until the drywall was installed.

### *The Solution*

Fi-Foil's Radiant Shield™ is offered in a Standard (non-perforated or vapor retarder) or Hi-Perm (perforated) Version. In this application, they used Hi-Perm.

By stapling the 48" wide Radiant Shield™ to the framing on the garage side of their knee wall, they were able to use it as the backing to support their batt insulation until the drywall was installed. In this application, Radiant Shield™ not only acts as an insulation facing, but also as a radiant barrier.

The Class A fire rating allows the builder the option of leaving the Radiant Shield™ exposed.
