

PROJECT PROFILE

RetroShield® System Metal Building Insulation Solution

ASTRO PAK®

Chesapeake, VA

Project Information

Owner:

ASTRO PAK®, Costa Mesa, CA

Insulation Contractor:

Tidewater Insulators, Norfolk, VA

Product Application:

RetroShield® System [18,000sf installed]

Completion Date:

November 2011

The Problem

Wanted to create a cleaner, more sanitary warehouse environment.

The Solution

Tidewater Insulation installed Fi-Foil's RetroShield® System which has also been used successfully in the renovation of other warehouses.

RetroShield® System combines RBI Shield™ reflective bubble insulation with a patented Clip & Pin System, used to attach the insulation to the bottom of the existing metal purlins, allowing you to leave the existing insulation in place. The reflective white facing used in this application will generate an additional R-12, acts as a radiant barrier and vapor barrier, and provides a clean, finished appearance.

“Although this was my installer’s first job using Fi-Foil’s RetroShield System, he earned his Christmas bonus on this one; finishing ahead of schedule” - Jeff Beals, Branch Manager of Tidewater Insulators.

ASTRO PAK® is an industry leader in passivation (application of hard non-reactive surface film that inhibits corrosion on metal surfaces), precision, high purity and chemical cleaning.
