Builder:

Josh Wynne Construction, Sarasota, FL

Insulation Contractor:

EcoTechnologies, Inc., Sarasota, FL

Application: M-Shield Reflective Insulation as Masonry Wall Insulation. [2,229sf home]

Completion Date:

March 2009

The Solution

First LEED Platinum Home in the State of Florida (LEED for Homes Platinum v.1 certification from the U.S. Green Building Council) Second in the entire United States and highest Scoring FGBC (Florida Green Building Coalition) Certified Green Home in the State.

This home is also certified by Energy Star, FPL's Build Smart program, Florida Yards and Neighborhoods Landscape, and the National Wildlife Federation.

"Home buyers are looking for quality and price, we hear it every day, and I just gave them what they wanted. I showed the homebuyers how they can save money with my design from day one and into the future. They didn't come in looking for a "green" home, they came looking to save money and they will!" stated Mr. Wynne. (Posted PRWEB - March 13, 2009)

As part of his environmentally-conscious design, Mr. Wynne incorporated Fi-Foil's M-Shield reflective insulation as the masonry wall insulation. This product contains no cellulose (no paper), so there is no food for mold. In addition, the product's perforated foil and synthetic backing layers allow for vapor transmission, so no moisture is trapped in the building envelope.
