

PROJECT PROFILE

AA2 Vapor Shield™ Reflective Insulation

The Slade at Channelside Tampa, FL

Project Information

Owner/Developer	Cobalt Development Group (Miami)
General Contractor	Case Contracting Co (Plant City)
Architect	Cohen Freedman Encinosa & Assoc (Miami Lakes)
Insulation Contractor	M&R Drywall Svcs (Pompano Beach)

Application: AA2 Vapor Shield™ Hi-Perm installed as mass wall insulation. Total of 150,000 Sq Ft

Completion Date: December 2008

The Solution

Mixed-use development includes 2 buildings, 8-story and 280 condo units (780 to 1,539 Sq Ft).

The Slade is ideally situated in the Channelside District, the location adjacent to Tampa's port and downtown business district, and is the epitome of convenience.

It provides Tampa with a fresh residential concept that blends urban convenience with affordable luxury in an attractive up-and-coming area.

AA2 Vapor Shield™ reflective insulation was substituted during the bid stage, because it provided the insulation contractor, M&R Drywall Services, a low cost alternative to foam board insulation and reduced both the material and labor costs on this project. Fi-Foil's AA2 Vapor Shield™ has been used as mass wall insulation in numerous other multi-family projects throughout Florida.

AA2 Vapor Shield
Suitable for installation
over wood or metal furring

- R-4.1
- 3/4" cavity
- R-4.6
