

PROJECT PROFILE

VR Plus Shield™
Reflective Insulation

US Citizens & Immigration Services Southeast FL Field Offices

Project Information

- Construction Manager** Master Builders of South FL (Ft Lauderdale)
- General Contractor** Moss & Assocs (Ft Lauderdale)
- Architect** JMWA (Boca Raton)
- Insulation Contractor** MGM Drywall (Miami)

Product Application:

VR Plus Shield™ installed as exterior mass wall insulation, over 7/8” metal framing.

Completion Date:

August 2008
200,000 Sq Ft

The Solution

Designed by JMWA Architects, the four building’s energy-saving features include Fi-Foil’s VR Plus Shield™ reflective insulation. VR Plus Shield™ used the enclosed 7/8” cavity to generate and R-Value of 5.0. And the product’s foil layers also reflect up to 97% of the radiant heat transfer through the walls of this building.

Moss & Associates served as General Contractor for this \$60 million construction program, and they began construction on the four new energy-efficient South Florida facilities for the US Citizens and Immigration Services (USCIS) in August 2007, with the final building completed in August 2008.

All four buildings were designed to achieve Leadership in Energy and Environmental (LEED) Silver Certification. These USCIS field offices are in Miami, Hialeah, and Kendall in Dade County and Oakland Park in Broward County, Florida.

VR Plus Shield™ reflective insulation was selected as the mass wall insulation for this project, because it supported their design intent to build facilities that promote energy and water conservation, are environmentally friendly and provide for a healthy indoor work atmosphere.
