

PROJECT PROFILE

VR Plus Shield™ Reflective Insulation

US Citizens & Immigration Services Southeast FL Field Offices

Project Information

Construction Manager:

Master Builders of South FL (Fort Lauderdale, FL)

General Contractor:

Moss & Associates (Fort Lauderdale, FL)

Architect:

JMWA (Boca Raton, FL)

Insulation Contractor:

MGM Drywall (Miami, FL)

Product Application:

VR Plus Shield™ installed as exterior mass wall insulation, over 7/8" metal hat channel. [Over 160,000sf]

Completion Date:

August 2008

The Solution

Designed by JMWA Architects, the four building's *energy-saving features* include Fi-Foil's VR Plus Shield™ reflective insulation. VR Plus Shield™ used the enclosed 7/8" cavity to generate and R-Value of 5.1. And the product's foil layers also reflect up to 97% of the radiant heat transfer through the walls of this building.

Moss & Associates served as General Contractor for this \$60 million construction program, and they began construction on these four new energy-efficient South Florida facilities for the US Citizens and Immigration Services (USCIS) in August 2007.

All four buildings were designed to achieve Leadership in Energy and Environmental (LEED) Silver Certification. These USCIS field offices are in Miami, Hialeah, and Kendall in Miami-Dade County and Oakland Park in Broward County, Florida.

"We are seeing rapidly rising demand for environmentally sustainable 'green facilities' from both the public and private sector," said Bob Moss, president/CEO of Moss & Associates. From Press Release - www.mosscm.com (2/08)
