

PROJECT PROFILE

RetroShield® System Metal Building Insulation Solution

Cummins Diesel Memphis, TN

Project Information

General Contractor:

Legacy Construction Services, Memphis, TN

Insulation Contractor:

Integrity Energy Solutions, Greenville, SC

Product Application:

RetroShield® System

Project Size: 25,000 square feet

Completion Date: July 2010

The Problem

Legacy Construction Services, Memphis, TN is in charge of renovations to improve energy efficiency and the appearance of the Cummins MidSouth region facilities.

The Solution

Integrity Energy Solutions installed Fi-Foil's RetroShield System in the first renovation of this Cummins Diesel MidSouth facility in Memphis, TN; and has now been contracted to do 10 more facilities in the South, as well as, a 200,000sf engine distribution warehouse in Memphis, TN.

Legacy Construction Services selected this insulation system because it allows the installers to work around Cummins Diesel's product inventory and equipment with scissor lifts, and eliminates any down time for the company.

Cummins MidSouth L.L.C. is the exclusive distributor of Cummins and Cummins Onan products (service engines and related technologies) in Alabama, Arkansas, Louisiana, and Mississippi. In addition, Cummins Mid-South, L.L.C. serves the panhandle of Florida, southern Illinois, eastern Missouri, and western Tennessee.
